LinkedIn: Guillermo Cardona Gómez

PROFESSIONAL SUMMARY

Software Engineer building enterprise applications with Angular, React, TypeScript, RxJS, and Nx. Experienced in feature ownership, API integration, automated testing, and troubleshooting across application and infrastructure boundaries. Currently leading the Consumption/Usage migration from Angular to a React remote within the existing monorepo, while maintaining both implementations. Growing expertise in backend development and distributed systems.

PROFESSIONAL EXPERIENCE

Software Engineer - User Interface Engineer | Teradata

September 2024 - Present

- Lead the technical direction and implementation of the Consumption/Usage migration from Angular to React, integrating React as a remote within the existing monorepo while maintaining both implementations in parallel.
- Own new feature development across OPF and Consumption/Usage, aligning existing interfaces and new functionality with UX designs and established design principles.
- Took end-to-end ownership of Connection Manager during a team transition, becoming a primary technical point of contact and coordinating implementation, technical decisions, and issue resolution across teams.
- Own features from requirements analysis and technical design through API integration, implementation, automated testing, cloud validation, debugging, and delivery.
- Build maintainable enterprise interfaces with Angular, React, TypeScript, RxJS, Nx, Signals, reusable components, dependency injection, and Jest-based unit testing.
- Investigate integration issues involving frontend applications, backend APIs, authentication flows, Kubernetes workloads, and remote cloud environments.

User Interface Engineering Intern | Teradata

September 2023 - September 2024

- Contributed to production enterprise UI applications using Angular and TypeScript, gaining experience in API integration, testing, code review, and Agile delivery before transitioning into a full-time role.

Full Stack Developer & Designer | Axolote Web Team

May 2023 - May 2024

- Built and delivered a responsive application for a fragrance business with a freelance team, contributing to UI/UX design, frontend development, backend functionality, and client requirements.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Frontend: Angular, React, RxJS, Nx, Signals, Next.js, HTML, CSS, Angular Material, Material UI, Tailwind CSS

Backend and databases: REST APIs, Node.js, Express, Django, Flask, PostgreSQL, MySQL, MongoDB

Infrastructure: Docker, Kubernetes, Linux, Bash

Engineering: Jest, Git, CI/CD, Agile, Scrum, Kanban, Jira, Data Structures & Algorithms

AI assisted engineering: AI coding agents, LLM-assisted code analysis, debugging, workflow automation

EDUCATION AND LANGUAGES

Escuela Superior de Cómputo - Instituto Politécnico Nacional

Computing Systems Engineering | Academic studies completed January 2025

Spanish: Native | English: Upper-intermediate (B2, self-assessed)
